

FCC's Energy Loan

Jeff Rowell, PAg

Relationship Manager, Charlottetown

Farm Credit Canada
Advancing the business of agriculture

Canada

Why the Energy Loan?

- Vision Panel feedback
- encourage customers to be more self-sufficient
- consistent with FCC strategic themes

Important considerations

- the energy project must be located on the farm or agribusiness property and more than 50 per cent of the applicant's income must be generated from farming or agribusiness activities
- customers are encouraged to research which renewable energy option fits their operation and the available government programs

Loan features

- special interest rate on the first \$500,000
- no loan processing fees on the first \$500,000
- limit of one loan per customer
- secured with real or personal property
- monthly, quarterly, semi-annual or annual payments available
- fixed or variable rates
- proceeds for construction/installation of geothermal, wind, solar or biogas

Benefits

- save money on your energy bills
- make your farm or business more cost effective and efficient
- contribute to reducing the demand on the energy grid
- take advantage of provincial and federal energy grants and incentives (where available)
